## THE JUPITER COLLECTION

Jupiter is one of the brightest planets visible to the naked eye - bright enough for its reflected light to cast visible shadows.

The famous storms in Jupiter's atmosphere give the planet its distinctive look of yellow, brown and red rings.

The Jupiter collection takes us on a trip to Jupiter.

The metallic copper / brass / black finish of the lamps echoes the colors of Jupiter's storms, and the lamps shape resembles the body of a satellite or a probe, offering the sense of a galactic journey.
